## Fire Risk Assessment HSF 91

This Fire Risk Assessment was undertaken in order to comply with the Regulatory Reform (Fire Safety) Order 2005 (the "Fire Safety Order").

The purpose of the report is to provide an assessment of the risk to life from fire, and where appropriate, to make recommendations to ensure compliance with fire safety legislation. The report does not necessarily address the risk to property or business continuity from fire. The survey was conducted as a "non-invasive" survey and only those areas of the building structure that were readily accessible were inspected.

The survey did not access inaccessible areas such as ducts, or all basements, lofts or ceiling voids.

	-
Responsible person	Vicki Bradley (HT/Premises manager)
Address of premises	All Saints CE(VC) First School Church Lane
	Standon
	Staffordshire ST21 6RN
HSW Service Assessor	John Burdett
	(Fire Risk Assessment Training from Kelly, May 2021)
Date fire risk assessment completed	February 2023
Date of previous fire risk assessment	June 2021 (following training)
Suggested date for review	February 2024

24.1	Fire safety is managed by:	Vicki Br	adley	
24.2	Has anyone else working in the premises been given any fire safety responsibilities and are these clearly identified and understood?	<mark>Yes</mark>	No	
24.3	Is there a suitable record of the fire safety arrangements?	<mark>Yes</mark>	No	
24.4	Do you have in place routine in-house inspections of fire precautions and are these recorded in the manual?	<mark>Yes</mark>	No	
24.5	Are adequate fire procedures in place?	<mark>Yes</mark>	No	
24.6	If you have answered "No" to any of the above, please provide further details of the action required to resolve the issue and add this to the action plan	Members of staff on site have specific roles if the fire alarm sounds. Caretaker has responsibility for keeping the outside area tidy and free from risk.		
25. Tra	ining and drills			
25.1	Are all staff given adequate fire safety instruction and training?	<mark>Yes</mark>	No	
25.2	Are they given additional training to cover any specific roles and responsibilities?	<mark>Yes</mark>	No	
25.3	Are fire drills carried out at appropriate intervals?	<mark>Yes</mark>	No	
25.4	Provide further information on the training you provide and if you have answered "No," to any of the above please provide further detail of the action required to resolve the issue and add this to the action plan	Annual refresher of roles and responsibilities given to staff. Fire drills occur termly and are recorded.		

26. Testing and maintenance								
26.1	Maintenance and testing of other fire precaution systems?	<mark>Yes</mark>	No					
26.2	Are systems in place for reporting and managing safety measures that have fallen below standard or are faulty? e.g. a fault log	Yes	No					
26.3	Are records kept for all the fire checks and tests identified above?	<mark>Yes</mark>	No					
26.4	Is a system in place for people to report concerns with fire safety or fire safety system problems?	Yes	No					
26.5	If you have answered "No," to the above please provide further detail of the action required to resolve the issue and add this to the action plan							

## Fire risk assessment – Risk Rating

A fire risk assessment considers the **likelihood** of fire in a premise (with fire prevention measures currently in place) in conjunction with the **potential consequences** in the event of a fire (death being the most extreme).

			Potential severity of harm						
			Slight 1	t Harm	Mo 2	derate Harm	Extreme 3	Harm	
	Hi	ghly unlikely	Trivia	1	Low	1	Medium		
	1		1		2		3		
Likelihood	Uı	nlikely	Low		Med	dium	High		
of fire	2		2		4		6		
occurring	Lil	kely	Medi	um	High	ı	High		
	3	•	3		6		9		
Risk Rating		Action Priori	tv						
		Immediate action required. Considerable resources might have to be allocated to reduce the risk. If the premises are unoccupied, it should not be							
High (6-9)		occupied until the risk has been reduced. If the premises are occupied, urgent action should be taken.							
Medium (3-4)		Actions to control the risk must now be considered and steps to manage the risk until control measures can be provided must implemented. It is essential that efforts are made to reduce the risk. Risk reduction measures, which should take cost into account, should be implemented within a defined time period. Where moderate risk is associated with consequences that constitute extreme harm, further assessment might be required to establish more precisely the likelihood of harm as a basis for determining the priority for improved control measures							
Low (2)		Implement reasonable control measures and monitor. No major additional fire precautions required. However, there might be a need for reasonably practicable improvements that involve minor or limited cost							
Trivial (1)		No action re	quired u	nless level of	f harm o	or likelihood ch	nanges.		
Based on th	e fi	ndings in this	assessn	nent the fire	risk asso	essment for tl	nis building	g is:	
High		Me	dium		Low	x	Trivial		

An action plan has been provided separately to The Responsible Person for this Fire Risk Assessment.
